EDUCATION

Cornell University, Cornell Ann S. Bowers College of Computing and Info. Science <i>Master of Professional Studies (Data Science & Applied Statistics)</i>	Ithaca, NY <i>Expected May 2026</i>
Selected Coursework: Modern Regression Models, Time Series Data Analysis, Machine Learning, Deep Learning, Artificial Intelligence, Big Data Management, Rating Nations: Economic Indicators, Managerial Negotiations	
Narsee Monjee Institute of Management Studies (NMIMS) <i>B.Sc. (Applied Statistics & Analytics) CGPA: 3.82/4.0</i>	Mumbai, India <i>2022 – 2025</i>
Selected Coursework: Probability Theory, Hypothesis Testing, SQL Database Management.	

PROFESSIONAL EXPERIENCE

Course Assistant – Intro to Python for Business (NBA 6215) <i>Cornell University (SC Johnson College of Business)</i>	Ithaca, NY <i>January 2026 – Present</i>
- Partnered with lead faculty to deliver Python programming instruction, serving as a primary academic resource for business students during live lecture sessions. - Managed weekly student office hours, translating complex technical concepts into accessible business frameworks and troubleshooting specific coding challenges. - Conducted the grading and evaluation of student projects, maintaining high standards of academic rigour while providing consistent peer mentorship.	
Project Intern, Market Research Department <i>Emcure Pharmaceuticals</i>	Mumbai, India <i>March 2025 – May 2025</i>
- Worked with a cross-functional team through the full lifecycle of a Six Sigma product launch analysis across 14 separate therapeutic categories. - Collaborated to build automated data workflows that reduced processing time by 70%, enabling the broader department to run future analyses with significantly enhanced operational efficiency. - Engineered predictive sales models and market trend analyses that informed strategic decisions for 1,900+ product subgroups, linking prescription patterns to direct revenue outcomes.	
Project Intern, Data Science and Analytics Group <i>ICICI Bank Head Office</i>	Mumbai, India <i>May 2024 – June 2024</i>
- Executed end-to-end opportunity analysis for NRI ecosystem growth (geographic business expansion), combining predictive modelling with multi-source demographic data scraping techniques. - Engineered regression models ($R^2 = 0.87$) mapping affluence patterns and market dependencies across NRI segments to back up strategic geographic decisions with concrete hard evidence.	
Summer Intern, Internal Audit Department <i>Ernst & Young LLP</i>	Mumbai, India <i>June 2023 – July 2023</i>
- Executed an insurance claims analytics initiative through Python-driven exploratory data analysis with visualization techniques and multivariate regression model development. - Established foundational insights into claims adjudication processes through systematic investigation of variable interdependencies within historical accident data.	

LEADERSHIP & ACADEMIC PROJECTS

President, B.Sc. Placement Cell Founding Member, Research Cell & Music Club (NMIMS)	July 2024 – July 2025
Capstone Project: Predictive Physiological Modeling (Cornell University)	May 2026
- Engineered a LightGBM regression model utilizing strict GroupKFold cross-validation to forecast offshore sailor fatigue 30 minutes in advance, achieving a highly constrained predictive fidelity of 0.34 RMSE. - Translated statistical outputs into an actionable 3.7 ln_rmssd “Soft Margin” dashboard, establishing an 85%+ reliable early-warning buffer to prevent catastrophic physiological collapse. - Leveraged SHAP value analysis to present algorithmic architecture to industry sponsors, directly securing a post-graduate consulting contract to further develop the pipeline for commercial deployment.	
Published Researcher (SPRINGER Proceedings)	February 2024
- Authored a socio-technical analysis examining 3 major Indian financial frauds (1992-2018), employing the Fraud Diamond Model to understand behavioural drivers across INR 50,000+ crore scam cases. - Accepted for publication in <i>SPRINGER Proceedings in Business and Economics</i>. DOI: 10.1007/978-981-97-7030-49	

TECHNICAL SKILLS

Programming & Analysis: Python, R, SQL, SAS, MATLAB, SPSS
Tools & Visualization: Tableau, Google Colaboratory, Microsoft Office Suite (Excel, PowerPoint, Word)
Methodologies: Predictive Modeling, Time Series Forecasting, Regression Analysis, A/B Testing, Machine Learning

INTERESTS & EXTRACURRICULARS

Martial Arts: 3rd Degree Black Belt (Kyokushinkai Karate), Rank of Shinobi (Ninjutsu), Chen Style Tai Chi, Shaolin Kung-Fu, Master in Hath Yoga.
Music & Debate: Grade 8 Piano (Distinction, Trinity College London), Tabla (Praveshika Purna), Avid MUNner (Multiple Awards). Head of Music Club (Nov 2023–June 2024).
